

170 x 200 mm

The diagram shows a roof truss structure with a horizontal base line and a vertical centerline. The truss consists of a horizontal bottom chord and a horizontal top chord. The top chord is divided into two equal segments by the vertical centerline. The roof slope is indicated by dashed lines connecting the ends of the top chord to the ends of the bottom chord. Two rectangular panels are shown, one on each side of the centerline. The left panel is labeled '170 x 200 mm' and the right panel is labeled '170 x 245 mm'. The panels are outlined in magenta. The entire drawing is enclosed in a green border.
