

100 x 64 mm

This technical drawing shows a rectangular plate with a width of 100 mm and a height of 64 mm. A triangular cutout is located at the bottom left corner, with its vertex at the bottom-left corner of the plate. The cutout is defined by a horizontal dashed line extending from the vertex to the right edge, and two diagonal dashed lines extending from the vertex to the top edge and the right edge. The plate is centered within a grid of solid green lines, with a vertical dashed line to its left and a horizontal dashed line below it.

100 x 85 mm

This technical drawing shows a rectangular plate with a width of 100 mm and a height of 85 mm. A triangular cutout is located at the bottom left corner, with its vertex at the bottom-left corner of the plate. The cutout is defined by a horizontal dashed line extending from the vertex to the right edge, and two diagonal dashed lines extending from the vertex to the top edge and the right edge. The plate is centered within a grid of solid green lines, with a vertical dashed line to its left and a horizontal dashed line below it.
